PROFILE

Product Manager with 9 years of experience building B2B and B2C products, driving product strategy, 0-to-1 development, and continuous improvement. Experienced in identifying customer and business problems, translating them into scalable product solutions, and delivering measurable outcomes through automation and process optimization. Combines end-to-end product ownership with strong technical understanding and hands-on AI product innovation.

EXPERIENCE

DP WORLD | Group Product Manager I

Hyderabad, India | July 2023 – Present

Freight Forwarding Platform

- Owned strategy, roadmap, and delivery of core freight forwarding modules on a global platform supporting 185+ branches and processing approximately 1 million shipment transactions annually.
- Led 0-to-1 development of the Customer Integration Suite, building scalable integration and onboarding capabilities to streamline customer connectivity and accelerate implementation workflows.
- Reduced branch onboarding time by 92% (12 hours to 1 hour) by introducing automated configuration and permission-management capabilities, saving over 1,700 operational hours since launch.
- Led development of an integrated Carrier Booking module, bringing carrier bookings, Shipping Instructions (SI), Verified Gross Mass (VGM), and real-time status updates into one platform, eliminating repetitive data entry across carrier portals.
- Led UX and process optimization informed by benchmarking against two competitors; advanced bulk actions, shortcuts, and streamlined workflows reduced end-to-end shipment processing time by 38.5% (13 to 8 minutes), versus a 15-minute competitor benchmark.
- Drove regional rollout and adoption of cross-border and road freight capabilities across South Africa, Namibia, and Kenya, partnering with operations and engineering teams to address regional requirements.

General Cargo Terminal Operating System (TOS) | 0-to-1 Product

- Led 0-to-1 development and rollout of a General Cargo Terminal Operating System across two terminals handling approximately 20 million metric tonnes annually, digitizing paper-based workflows and enabling end-to-end planning and execution visibility.
- Owned high-impact resource planning and execution modules, integrating resource allocation, work progress monitoring, and operational tracking into a unified platform to improve coordination and operational visibility.

EXPERIENCE (CONTINUED)

BLUME GLOBAL | Senior Product Business Analyst

Bengaluru, India | August 2021 – July 2023

- Contributed to the development of vessel and container visibility and tracking capabilities, translating complex logistics requirements into product features to improve shipment monitoring and operational visibility.
- Supported the development of contract management features, defining business workflows, functional requirements, and integration specifications for enterprise logistics customers.
- Collaborated with customers, engineering, and QA teams throughout product discovery, solution design, and delivery, leveraging EDI, APIs, JSON/XML integrations, and Tableau analytics to support enterprise implementations.

E2OPEN | Product Business Analyst

Hyderabad, India | February 2018 – August 2021

- Managed end-to-end enterprise solution implementations, translating customer requirements into system configurations and integration workflows while coordinating delivery across technical and business teams.
- Drove customer discovery, solution validation, and issue resolution across implementation lifecycles, ensuring successful deployments and seamless handover to customer operations teams.

PRODUCT INITIATIVES

Pulse Board | AI-Powered Product Intelligence

- Conceptualized and developed Pulse Board using local LLMs to analyze support tickets, identify recurring issues by theme and product module, assess sentiment at ticket and module levels, and generate executive summaries to support product prioritization.

Stowage AI | AI-Powered Vessel Intelligence

- Developed a local-LLM-powered proof of concept to simplify retrieval of vessel particulars and stowage plans; demonstrated it to business stakeholders and gathered positive initial feedback.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering | Andhra University | 2013–2017

AWARDS & RECOGNITION

DP World Kudos Awards (2025 × 2) | Blume Global Medallion Award (2022) | E2open Individual Excellence Award (2020)
